"Pressure and challenges are opportunities to demonstrate true strength, to thrive not just survive, and rise to the occasion."

Summary

With more than 8 years of experience in the fields of IT and Software Development, my passion comes from making a positive impact to millions of people who rely on mission-critical enterprise-grade systems, while developing effective synergies and workflows among the different disciplines of engineers and software developers to deliver innovative and scalable solutions.

Putting my passion into practice, I've had the opportunity to lead several development teams as a Technical Lead to bring together diverse teams to develop efficient, human-centric workflows that have helped boost productivity, increase cohesiveness among teams, and allowed meaningful tracking of work done. Leveraging on that experience, I moved on to become a Technical Manager to oversee and nurture Technical Leads and Developers across the enterprise, consisting of over 100 personnel, in order to ensure that the teams are aligned with the business goals and objectives to achieve operational excellence.

Work Experience

EMQ2 Technology Services Pte Ltd

Singapore

PARTNER

Dec 2022 - Present

- Led the strategic vision and decision-making for a portfolio of highly-sensitive digital transformation projects, valued at over SGD 1 million, impacting millions of stakeholders, including public servants and the general public.
- Orchestrated the development and implementation of Gateway and Platform-based systems facilitating secure and seamless transactions related to User Authentication through Singapore's National Digital Identity Initiatives and Payment Systems, encompassing widely recognized platforms and widely adopted payment methods.
- Played a pivotal role in ensuring the reliability and trustworthiness of systems supporting millions of daily transactions, maintaining a 99.999% uptime and delivering uninterrupted services to government agencies and citizens.
- Catalyzed transformative digital initiatives, revolutionizing service delivery and driving organizational growth in the digital age, with a profound impact on millions of individuals.
- Pioneered the establishment of robust systems and processes, playing a pivotal role in achieving ISO 27001 Certification for Information Security Management Systems, instilling a culture of rigorous data protection and privacy across the organization.

DANAMIC Pte Ltd

Singapore

TECHNOLOGY DIRECTOR

2018 - Present

- Managed all technology and IT-related solutions, resulting in a 25% increase in productivity through the implementation of automated processes and streamlined communication systems
- Implemented and optimized company-wide digital workflows and processes using tools such as Atlassian JIRA for project and task management, with approvals and checks in place to ensure compliance. Designed event-based triggers for notifications, resulting in a 15% reduction in errors and a 20% increase in team collaboration and accountability.
- Deployed IT solutions for diverse clientele, including Media and B2B companies, resulting in a 20% increase in customer satisfaction by providing customized solutions and providing ongoing technical support
- Led a team of IT professionals in training staff members to adopt technological solutions and adapt digital workflows, resulting in a 30% increase in efficiency. Developed and delivered training programs and created documentation and guides for the new processes. Additionally, designed and implemented flexible working arrangements and processes in response to the COVID-19 pandemic, ensuring continuity of operations and support for remote working.

Zionext Pte Ltd

Singapore & Chennai (India)

TECHNICAL MANAGER

2020 - 2022

- Successfully managed and led a team of Technical Leads across the company, ensuring the welfare, progression and cohesiveness of all teams as a key member of the Management Team with Company Directors.
- Developed and implemented training strategies that enhanced the technical capabilities of employees, resulting in increased competitiveness for the company and fair career progression for staff.
- Provided expert advice on departmental policies and adaptations to continuously improve productivity and innovation in all functional roles within the organization.
- Actively nurtured and mentored new Technical and Functional Leads, fostering a company culture that values risk-taking, promotes innovation and ownership across all employee levels.
- Served as a hiring manager for technical staff, effectively determining human resources allocation across various organizational and functional units.

Kydon Learning Systems Group

Singapore & Malaysia

2019 - 2020

- Expertly managed a team of over 30 Software Engineers, effectively overseeing an extended portfolio of more than 30 active projects spanning the public and private sectors.
- Coordinated closely with key stakeholders, including DevOps Engineers, Product Owners, Project Managers, Business Analysts and Quality Assurance Specialists, to ensure the smooth and timely delivery of all projects.
- Proven track record of delivering projects on-time, within scope and budget, while continuously improving the process and team performance.
- Consistently exceeded expectations by implementing best practices, standards and methodologies, resulting in increased efficiency and productivity.
- Demonstrated strong leadership skills, effectively motivating and mentoring team members to achieve their full potential.

MQ Spectrum Pte Ltd

Singapore

TECHNICAL LEAD / SENIOR SOFTWARE DEVELOPMENT ENGINEER

2018 - 2019

- Led a team of over 10 Software Engineers, effectively managing the day-to-day operations on multiple high-value projects spanning the public and private sectors.
- Spearheaded new initiatives to build sustainable Software Engineering Teams by implementing Agile development methodologies and adopting the SCRUM framework for daily operations with CI/CD pipelines.
- Conducted thorough Code Reviews, ensuring high-quality and efficient code in all assigned projects.
- Demonstrated strong leadership and technical abilities, effectively managing and mentoring the team to achieve project goals.

SOFTWARE DEVELOPMENT ENGINEER

2015 - 2018

- Proposed and pitched new technical solutions that fulfilled various business objectives and requirements for existing and prospective clients.
- Successfully executed and remedied issues raised during Vulnerability Assessment and Penetration Testing for developed systems, ensuring the security and stability of the systems.

SOFTWARE DEVELOPMENT ENGINEER INTERN

2015

- Assigned and implemented customised, incremental features for respective clients, each with their unique Technical Design Specifications
- Implemented and deployed bug fixes for issues reported for ongoing and upcoming projects

Certifications

Certified Solutions Architect - Associate

Singapore

AMAZON WEB SERVICES (AWS)

2022

- A highly experienced and certified AWS Solutions Architect Associate with a proven track record of designing, deploying, and scaling complex, nationwide systems on the Amazon Web Services platform.
- Utilizing a broad range of AWS services including EKS, ECS, CloudFront, WAF, ElastiCache, MemoryDB, Route53, IAM, CloudFormation, Lambda, and API Gateway, I have expertly migrated on-premises workloads to the cloud and optimized the cost of running applications on AWS.
- In-depth knowledge of AWS services and solutions, along with my ability to anticipate and address potential scalability and availability challenges, has directly contributed to the successful implementation of highly-scalable nationwide systems.

Certified Cloud Practitioner

Singapore

AMAZON WEB SERVICES (AWS)

2021

- Certified AWS Cloud Practitioner with knowledge of basic AWS concepts and services, including EC2, S3, RDS, and Elastic Beanstalk.
- Familiarity with the AWS global infrastructure and basic security and compliance features.
- Skilled in identifying and defining requirements for an AWS-based application and able to recommend the appropriate services to use.
- Experience in cost management and monitoring of AWS resources.

NICF Certified ScrumMaster

Singapore

SCRUMALLIANCE
