Professional Summary

An accomplished technology leader, with over a decade of experience, specializing in **architecting, scaling, and empowering elite, high-velocity engineering teams**. Governed the delivery of nation-wide digital transformation projects and initiatives through a foundation in hands-on software architecture with deep expertise in servant leadership, agile transformation, and strategic technology evangelism. Proven track record directing portfolios valued at over SGD 10M delivering **mission-critical Singapore Government systems** and other secure platforms processing **10M+ daily transactions**.

An architect of operational excellence who translates long-term **business objectives into strategic technology roadmaps**, guiding the infrastructure decisions that ensure mission success, including building the systems and processes necessary for **ISO 27001 certification**. A hands-on leader who combines deep system architecture expertise with a proven ability to orchestrate the full lifecycle delivery of mission-critical initiatives, **scale engineering organizations**, implement operational best practices, and establish robust agile frameworks, all while cultivating a **culture of relentless innovation and radical ownership**.

Core Competencies

- **Leadership & Management:** Hands-on Technical Leadership · Engineering Team Building & Mentorship · Performance Management & Hiring · Motivating High-Performance Teams
- **Strategy & Platform Vision:** Setting Technical Vision & Strategy · Platform Growth Planning · Scalability Roadmapping · Questioning Assumptions · Big Picture Thinking
- **Solutions Architecture & Systems Design:** High-Scale Distributed Systems · API Design & Development · NoSQL Data Stores (Cassandra, Solr, Redis, Memcached) · Performance Engineering (P95/P99) · Data Modeling · Java/JVM Development
- **Project & Delivery Management:** End-to-End Project Leadership · Inception-to-Production Delivery · Deadline-Driven Execution · Multi-Project Context Switching · Meticulous Attention to Detail
- **Collaboration & Communication:** Cross-Functional Collaboration (Product, Design, Business) · Deep Technical & Product Discussions · Complex Problem Analysis · Stakeholder Influence

Professional Experience

Co-Founder & Partner, Portfolio Operations

SANDPIT Pte Ltd

Singapore
2024 - Present

- **Advised C-level leadership** across a portfolio of technology companies on scaling engineering organizations and implementing operational best practices.
- **Guided strategic technology roadmaps** and infrastructure decisions to align with long-term business objectives and secure competitive advantages.
- **Directed high-impact initiatives** at the portfolio level to drive systemic improvements in operational efficiency, system scalability, and performance.

Partner & Director, Digital Transformation (Public Sector)

EMQ2 Technology Services Pte Ltd

Singapore
2022 - Present

- **Directed a strategic portfolio** of highly sensitive, mission-critical digital transformation projects for the Singapore government, valued at over **SGD 10M**.
- **Governed the architecture and delivery of multiple national-scale systems**, including the public-facing National Digital Identity (NDI) services for the Ministry of Home Affairs and other secure platforms processing **10M+ transactions daily**.

- **Achieved and maintained 99.999% uptime** across all mission-critical systems through strategic operational planning and rigorous execution.
- **Secured the company's ISO 27001 Certification**, establishing and enforcing an organizational culture of rigorous security and data privacy from the top down.

Technology Director

DANAMIC Pte Ltd

Singapore
2018 - Present

- **Architected and governed the company's entire technology strategy**, directly contributing to a **25% increase in overall business productivity**.
- **Drove digital transformation across all business units**, implementing and optimizing company-wide workflows that reduced project errors by 15%.
- Delivered customized IT solutions for B2B and media clients, achieving a **20% increase in customer satisfaction scores**.
- Pioneered the company's remote work infrastructure in response to the COVID-19 pandemic, **ensuring 100% operational continuity**.

Technical Manager

Zionext Pte Ltd

Singapore
& India
2020 - 2022

- **Managed and mentored a team of Technical Leads**, elevating the company's leadership capabilities and technical execution across multiple departments.
- **Developed the company's technical training and career progression framework**, fostering a culture of innovation and increasing employee retention.
- **Advised company directors on departmental policies** and resource allocation, directly improving cross-functional productivity and efficiency.
- **Governed the end-to-end technical hiring process**, from strategic resource planning to final allocation, building high-performance teams.

Technical Lead of Operations & Support

Kydon Learning Systems Group

Singapore
& Malaysia
2019 - 2020

- **Directed a department of 30+ engineers**, overseeing the successful delivery of a **30+ project portfolio** for major public and private sector clients.
- **Owned the entire project delivery lifecycle**, ensuring all projects were completed on-time and on-budget by coordinating with DevOps, Product, and QA stakeholders.
- **Drove a significant increase in departmental efficiency** by implementing and enforcing engineering best practices and agile methodologies at scale.

Technical Lead / Senior Software Development Engineer

MQ Spectrum Pte Ltd

Singapore
2018 - 2020

- **Led and mentored a team of 10+ engineers**, managing day-to-day operations and fostering their professional growth.
- **Established the department's first Agile, SCRUM, and CI/CD frameworks**, building a foundation for sustainable and scalable software development.
- **Enforced high standards of code quality** through systematic code reviews, improving system stability and reducing technical debt.

Software Development Engineer

MQ Spectrum Pte Ltd

Singapore
2015 - 2018

- **Engineered and pitched end-to-end technical solutions** that directly addressed client business requirements.
- **Secured critical systems** by identifying and resolving complex vulnerabilities from Vulnerability Assessment & Penetration Testing (VAPT).
- **Implemented and deployed customized features** according to complex technical specifications for multiple client projects.
- **Resolved and deployed critical bug fixes**, ensuring the stability and reliability of ongoing and upcoming projects.

Teaching & Mentorship

Associate Lecturer

2023 - Present

Ngee Ann Polytechnic

- Instructed and mentored the next generation of software engineers by teaching **core computer science modules**.
- Key Modules Taught:
 - **Artificial Intelligence Concepts & Techniques**
 - **Software Analysis and Design**
 - **Data Structures & Algorithms**
 - Empowering Your Workforce with Generative Artificial Intelligence
 - DevOps Tools & Techniques
 - Software Testing
 - Programming Methodology and Algorithms

Project Mentor

National University of Singapore

2024 - Present

- Mentor undergraduate teams in the Ideas to Pitches: Tech, Innovation & Entrepreneurship (UTC2734) module under the University Town College Programme (UTCP), guiding students in developing innovative business concepts and tech-driven solutions.

Key Projects

MHA Common Services (Login & Payment Gateway) for Ministry of Home Affairs (MHA)

2020 - Present

Benjamin was instrumental in the operational management of this national platform, which integrated over 100 eServices to handle 10 million monthly transactions. He coordinated cross-functional teams, managed resources, and oversaw complex technical integrations to ensure adherence to stringent government standards. His leadership was key to the smooth deployment and the establishment of sustainable practices, resulting in significant improvements to public service efficiency and reliability.

Smart Building Management System

for Ministry of Defense of Singapore (MINDEF) & Defence Science Technology Agency (DSTA)

2023 - 2025

Benjamin was instrumental in the development of several Smart Building Integrated Systems for the new CMPB, which opened in September 2025 for the Defence Science and Technology Agency (DSTA) and MINDEF. These systems, including a sophisticated Event, Content, and Feedback Management System, are now used daily by MINDEF officers, distinguished guests, and members of the public. Public coverage detailing the launch and features of this new national service hub can be found here:

- [MINDEF: New Central Manpower Base Enhances National Service Experience](#)
- [The Straits Times: One-stop hub for NS-related services to be ready from 2025, new app to be rolled out](#)
- [The Straits Times: New CMPB to start welcoming visitors from June, officially opening in September](#)

Online Mock Theory Test (SPFMTT) for Singapore Police Force (SPF)

2021 - 2024

Benjamin led the team that developed and launched the online Mock Theory Test for the Traffic Police, a free public platform designed to enhance road safety. Pivotal in its operational delivery on the GCC-AWS 2.0 cloud, he implemented continuous process improvements and robust risk mitigation strategies to ensure high system availability. His effective management was key to exceeding strict security standards and delivering a reliable tool for a critical public service. Media coverage celebrating the successful deployment of this nationwide public platform can be found here: [The Straits Times: Practise traffic theory tests online for free on new mock test platform](#).

Home Team Learning Management System (HTLMS) for Ministry of Home Affairs (MHA)

Benjamin led the pioneering team that developed and deployed the very first Home Team Learning Management System, a transformative project that unified training and development for the entire Ministry of Home Affairs. This foundational system set the stage for a modern, robust learning ecosystem for all Home Team officers. Accolades and reports on the strategic learning initiatives supported by the work Benjamin and his team accomplished can be found here:

2016 - 2018

- [OpenGov Asia: Minister K Shanmugam outlines four areas of focus to build a robust training and learning ecosystem for the Home Team](#)
- [The Straits Times: Home Team investing in technology and academic courses to improve officer training](#)

Key Professional Certifications

AWS Certified AI Practitioner	2025
AWS Certified Solutions Architect	2022
AWS Certified Cloud Practitioner	2015
NICF Certified ScrumMaster	2015
IBM Enterprise Design Thinking Co-Creator	2023
Neo4j Certified Professional	2025
Certificate of Technical Assessment for Solutions Architect, GovTech Singapore	2022
GCC Certified – Foundation, GovTech Singapore	2022

Education

National University of Singapore	Singapore
Bachelor of Computing with Honors, Computer Science	
Certificate of Distinction in Networking and Distributed Systems	
Certificate of Merit in Software Engineering	
Certificate of Merit in Computer Security	
Ngee Ann Polytechnic	Singapore
Diploma with Merit, Information Technology	
Diploma Plus Certificate in Advanced Computing Mathematics	
Recipient of IDA Integrated InfoComm Scholarship	
Microsoft Gold Medal & Prize (For most outstanding performance)	
Motorola Prize (For most outstanding academic performance)	
NCS Prize (For most outstanding academic performance in the Solutions Architect specialization)
